

Law Enforcement Catalog

Blackinton[®]

www.blackinton.com

THE BLACKINTON® ADVANTAGE

The Blackinton® name has been synonymous with expert craftsmanship since its early beginnings in 1852. The high standards that Virgil Blackinton established in those early days were strictly enforced throughout the decades and we continue to do so to this day. Of course today, we also combine that old world craftsmanship with cutting-edge manufacturing technology to produce the finest quality badges and insignia for law enforcement professionals.

At Blackinton®, we are proud of our early American heritage and proud that our products are made in the USA. Our company is the largest manufacturer of badges and insignia, created by highly skilled and talented individuals working together to achieve artistry in metal.

Today, our full range of products offers proof that the tradition of versatility, creativity and fine craftsmanship established in 1852 is still the driving force behind the Blackinton® name. It's what we call the Blackinton® Advantage and it's what makes Blackinton® the number one choice of law enforcement professionals everywhere.

All products in this catalog are shown actual size unless otherwise noted.

BLACKINTON® CUSTOM DESIGNED BADGES

Blackinton® custom badges are designed with your input to meet specific department requirements. Your Blackinton® badge can incorporate unique design elements such as local landmarks, historic buildings, or other symbols of your town, city, or state. A customized center seal can also be included to add color and to further personalize your badge. You may choose from a wide variety of unique finishes offered by Blackinton® and described in more detail on pages 86 – 88. For additional information on specialty and custom commemorative badges, please refer to pages 52 and 53.

Custom badges illustrated on this page are manufactured exclusively for the departments shown and are not available for sale.

BLACKINTON® CUSTOM COMMEMORATIVE BADGES

We will help you achieve exactly what you have in mind when the occasion calls for a truly memorable commemorative badge. Our designers will first develop your ideas, symbols, or other reference materials into an artist's rendering for your approval. This artwork is then transformed by our highly skilled die makers into a steel die, which captures every subtle detail of your unique design. The badge then takes on enhanced substance and shape as it travels through the remaining manufacturing process, resulting in a commemorative badge that your department will be proud to wear.

Commemorative badges illustrated on this page were designed exclusively for the departments shown and are not available for sale.

ENGRAVED COMMENDATION BARS

ECONOMICAL CUSTOM SOLUTION

^ Engraved commendation bars offer customization without a die cost for small custom orders, and a sound quality manufacturing alternative to applying characters to commendation bars.

Engraveable commendation bars (see our website for a complete listing) can be engraved with block lettering and/or the symbol of your choice. We also offer ONE color in the engraved area (examples on right). If a color is not specified the bars receive clear in the engraved area and the metal will show through (examples on the left).

A7140-LS with SYM-24

A7140-LS with Sym-24 filled with red enamel

A7140-LS Your lettering

A7140-LS Your lettering filled with white enamel

Blackinton® does not recommend applying characters to commendation bars as they do not meet our high quality standards. Applied character bars are no longer repaired for free.

AVAILABLE SYMBOLS (September 2021)

These symbols of recognition can be awarded to the most deserving members of your department to honor exemplary service, to mark a special achievement, or simply to show appreciation for a job well done. Blackinton® offers a variety of ways to turn badges, insignias, and medals into high quality keepsakes by encasing them in crystal clear Lucite or mounting them on rich, solid wood plaques.

These top quality awards can be designed as display pieces or as functional items such as pen holders, desk sets, paperweights, and so on. Blackinton® Lucite embedments and plaques can be ordered to your specifications. Standard plaque sizes are listed below. Other plaque shapes and sizes are available. Lucite is also available in a wide variety of shapes and sizes.

Please contact your local dealer for more information about these products.

EXPERIENCE MEETS INNOVATION

CUSTOM BADGES

Whether you're looking to create an Anniversary badge, a new duty badge, or a badge for a special occasion, we can help. Connect with the community by including a local landmark; state, city, or town symbol, or a historic building. Our designers will work with you to make your vision a reality.

AWARENESS BADGES

Bringing awareness to the fight against Breast Cancer, and other causes was the catalyst for our colorful awareness badges. We take pride in being the first badge manufacturer to bring awareness badges to the market. We donate 10% of sales from our Breast Cancer line to charity.

SCAN TO LEARN MORE

UNLIMITED COLORING™

Because demand has grown for a more advanced use of color on metal badges we developed our proprietary technology. It enables us to cost effectively add color to a metal badge without disrupting the detail in the metal. We can add unique designs without the need for a new die.

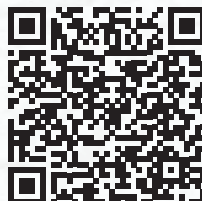

SCAN TO LEARN MORE

FLEXBADGE®

A 3D flexible alternative to the traditional law enforcement patch and direct embroidery. FlexBadge is exceptionally detailed and has a metallic finish, thus it conveys authority. We have over 100 standard styles that are available with no minimums, and we offer custom designs.

Two Tone badges with applied panels are only available with Rho-Glo® background and Hi-Glo® panels or Hi-Glo® background and Rho-Glo® panels.

BLACKINTON® FINISHES AVAILABLE

NICKEL PLATE

Nickel Plate is a hot nickel solution applied by the electroplating process to the polished base metal of a badge. It is silver in color and has a fair degree of hardness. Nickel plate will sometimes lose some of its luster with age.

RHODIUM PLATE

Rhodium, an element within the platinum metal group, is a precious metal that is applied by the electroplating process over a bright nickel base. Rhodium can be distinguished by its brilliant white finish and is tarnish resistant. It will not discolor or peel from the surface of a badge.

RHO-GLO®*

A base material which has a solid silver color throughout and requires no surface plating. Highly polished to a brilliant luster, a clear coating is then applied to enhance its durability.

GOLD ELECTROPLATE

A deposit of 22K+ fine gold electroplate on base material for a rich, bright appearance.

HI-GLO®*

A base material which has a golden color throughout and requires no surface plating. Highly polished to a brilliant luster, a clear coating is then applied to enhance its durability.

V.H.B. KK®*

Heavy gold electroplate (HGE) is the ultimate in 24K+ fine gold plate. This process applies a uniformly thick coating of tarnish proof high karat gold, purer and more durable than gold plate.

ROSE GOLD

A darkened gold electroplated base material which is hand rubbed to create the appearance of an antique gold finish.

V.H.B. BLACK

A subdued black finish over a base material which is then lacquered to provide a durable finish and also minimizes reflection.

V.H.B. BRONZE

A base material, blackened and hand rubbed leaving the appearance of natural oxidation from age. A clear lacquer coating is applied to enhance its finish and durability.

TWO-TONE

A combination of gold and silver colors. Badges with applied panels will normally consist of Hi-Glo® material for the gold color and Rho-Glo® material for the silver color. Badges of one-piece construction will consist of Hi-Glo® panels and rhodium background or Rho-Glo® panels and gold plate background.

Blackinton

GENERAL DEALER INFORMATION

PLACING ORDERS

You must be an authorized Blackinton® distributor to place orders with our factory. Orders must be placed using official Blackinton order forms or through our online web portal. Handwritten orders will not be accepted. To find out more about becoming a dealer, please contact us through our website www.blackinton.com.

CANCELLATIONS & CHANGES TO EXISTING ORDERS

The nature of our operation is such that changes or cancellation of orders once received are extremely time consuming and simply delay the processing of orders on-hand. Within 24 hours of placing an order it can be canceled with no penalty. After 24 hours of placing an order it can be canceled, but there will be charges incurred based upon where the product(s) is in the manufacturing process.

After submitting an order using the Web Wizard ordering portal you have a ONE HOUR window in which you can go back into your order and edit or delete the order. After this hour you need to contact customer service for assistance.

DELIVERIES

Most orders received in our office are processed through our order entry system usually within 24 hours. Orders found to be incomplete are set aside until missing information can be obtained. The process of producing a quality badge is unavoidably time consuming. Although we carry a large inventory of stock components, they are all in a raw state and require additional work prior to assembly. Normal delivery on orders is between 3 to 5 weeks. However, if hard enamel is used, or custom badge styles, panels, or other components are needed, the lead time will be extended. Under our QuickShip program orders ship within 5 business days of order receipt.

Due to our stringent quality control guidelines, a badge may be rejected at any point throughout the manufacturing process. Once this occurs it may have to be remade, again causing unavoidable delays. Delays of this type are minimal however.

DIES

For our complete Die policy visit our customer care center on our website, www.blackinton.com. We welcome all requests for new dies. All dies manufactured by Blackinton® are owned by Blackinton® subject to the following provisions relating to use and control of the die by the end user or dealer. A die for a badge, seal, or panel fabricated by Blackinton® in accordance with an end user specific design is considered an end user controlled die. The right of dealers to order badges, seals, or panels utilizing an end user controlled die shall be subject to the control of the end user. In instances where a dealer provides a die or a dealer requests fabrication of a die incorporating a specific design, that is not an end user design the dealer controls the use of the die. However, Blackinton® may produce an identical or substantially similar die for one or more other dealers unless the design is protected by a registered trademark or copyright. End user controlled dies and dealer designed dies may be subject to fabrication or set up fees.

The maintenance and storage of dies and tooling is the sole expense of Blackinton®. Blackinton® will not reproduce product incorporating copyrights or registered trademarks without proper permission. Blackinton® will retain possession of all dies and, except for dies furnished by an end user or dealer, Blackinton® will not return any die to any dealer or end user.

ART DESIGNS

To assure complete conformity to your requirements, please state clearly and in detail all of your specifications. Whenever possible, include high resolution imagery of items in your design. Provide a rough drawing of your ideas which Blackinton will use to provide an artists rendering. This artwork remains the property of V.H. Blackinton & Co., Inc. It cannot be copied or used for competitive bidding without the express written consent of V.H. Blackinton & Co., Inc.

QUOTATIONS

We are happy to provide quotations upon request. All quotations are subject to changes contingent upon current cost of raw materials, strikes, accidents, or other delays unavoidable or beyond the company's control.
