FAQ

HOW DO I DOWNLOAD IMAGES?

To download product images and logos found in this catalog go to images.rockybrands.com. For lifestyle images please ask your Sales Rep or contact the Georgia Boot Marketing Team.

HOW DO I DOWNLOAD CATALOGS AND LINE SHEETS?

Go to Rockybrands.com. It's our online source for all things Rocky Brands. This is the one-stop-shop for marketing tools and resources to help you sell. Just click "MARKETING RESOURCES" to find catalogs, line sheets, price lists, and talker cards.

HOW DO I ORDER PRODUCT ONLINE?

Visit RBconx.com, a business to business site exclusively for direct ordering of Rocky Brands products by qualified dealers.

- Easy and convenient stock management never stock out of key styles
- View every available Rocky Brands' style with detailed descriptions and real time inventory
- Track your orders all the way through to delivery
- To get started, go to RBconx.com, click the help button, then click "Request access to RBconx"

SOCIAL POSTS & E-BLASTS

Have a sale or event coming up? Let us help promote it!

Submit a request form online at Rockybrands.com/socialmedia

Our Social Media Specialist will contact you to discuss the details

A proof of the ad/post/email will be sent to you and your Sales Rep to review prior to posting

We'll send you metrics afterward that include the following:

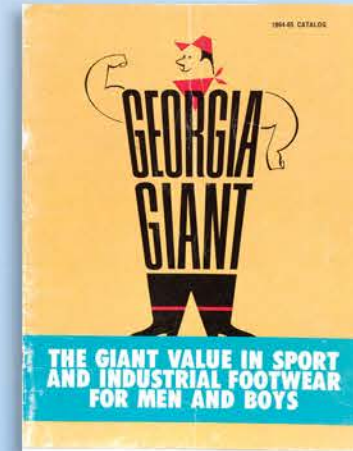

- Instagram & Facebook:** area targeted & total reach, # of impressions, engagement, # of comments, # of shares
- Email (if applicable):** # of sends, # of opens, # of clicks

4-H PARTNERSHIP

Georgia Boot has partnered with National 4-H Council from September 2020 through August 2023 to grow brand awareness while giving back to an incredible organization that is shaping our future leaders. We're leveraging this partnership to drive sales to some of our key retail partners in the farm and ranch segment through a cause marketing program. Reach out to your sales rep to learn more about how your store can participate.

MAKING AMERICA'S HARDEST WORKING BOOTS SINCE 1937

1937 While the country was in the midst of a recession, the Georgia Shoe Manufacturing Co. Inc. was founded in Atlanta, Georgia with the core objective of manufacturing dependable, low-priced work footwear.

1946 The company tried to position itself in a new market. Founded on creating quality work footwear, Georgia Boot aimed to capture farmers, hunters and hikers with the expansion into casual and outdoor footwear product lines.

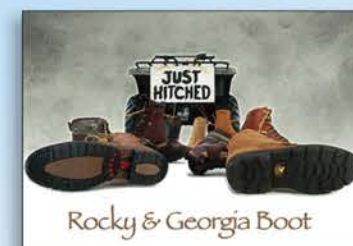

1991 Georgia Boot was the first brand to deliver true comfort in work boots with the launch of Comfort Core Technology, which introduced the comfort, resilience and energy return of athletic shoes to work boots.

1996-1998 In 1996, Georgia Boot introduced the iconic rubber rand and notched Goodyear® welt. Two years later, they released the Georgia Giant Romeo. The Romeo would go on to be the best selling boot for the company, selling over 1.6 million pairs since 2010.

2004 Rocky Brands, the parent company of Rocky Boots, acquired Georgia Boot and Durango.

2016 Georgia Boot expanded its line of comfort insoles to include AMP, TDC, CC5, CC6, and CC7 featuring memory foam, shock absorption, and ergonomic arch support. This expansion launched Georgia Boot's aftermarket insole line.

Through many years, moves, and expansions, the Georgia Boot brand has remained true to its core standards of providing a Giant value in quality work and lifestyle footwear.

FEATURE LEGEND

Comfort is key! Georgia Boot's AMP™ (Advanced Memory Polyurethane) footbed has a unique dual layer of polyurethane for maximum cushioning and a memory foam top layer to ensure that each boot's footbed is custom molded to your own foot.

AMP™ is a trademark of Georgia Boot®

The AMP LT footbed features the same comfortable memory foam that is found in the AMP (Advanced Memory Polyurethane) footbed. The major difference with the new AMP LT footbed is that it is lower profile and lighter weight while still providing outstanding cushioning and support.

AMP™ LT is a trademark of Georgia Boot®

Georgia Boot's Comfort Core® technology is a patented-designed, polyurethane energy return heel plug that stores energy as it's compressed by your foot, then releases that energy as you lift your foot. The inserts also feature an Air Flow System that forces air through the footbed as you walk to keep your feet cool and dry.

Comfort Core® is a registered trademark of Georgia Boot®

Need some support? The polyurethane Comfort Core CC5 footbed is designed to give your foot the comfort and stability it deserves. The ergonomic arch support found on the CC5 footbed ensures that your feet are comfortable on the job all day long. Extended perforations on the bottom of the footbed promote airflow and cooling inside your boot.

The CC7 insole features an extended base and added cushioning in the forefoot providing extra comfort and stability. The patented heel plug is designed to absorb the shock of every step and releases that energy as you lift, pushing air through that engineered air circulating perforations.

Our CC8 Comfort Core® Next Gen memory foam insole has a cushioning polyurethane base layer featuring individual Comfort Core® pillars that flex and absorb shock with each step. The top layer of memory foam conforms to your foot, giving you a supremely comfortable, customized fit. Airflow channels promote air circulation within the boot as you walk.

Georgia Boot's Technology Driven Comfort Footbed has strategically placed air channels to circulate air, ergonomic arch support for all day comfort and polyurethane construction that won't break down or lose its shape over time.

Quick Response Foam insole is made with an open cell polyurethane foam, providing excellent underfoot response and comfort. The unique open-cell structure of our Quick Response Foam creates a moisture management system, helping to move moisture away - keeping your feet cool and dry.

Breathable waterproofing. Air gets in, even though water can't. Water can try to flow past this obstacle, but there's a 100% guarantee it won't. Styles featuring the Georgia Waterproof System come equipped with a heavily fortified defense against water, because dry feet are happy feet.

We use a rare blend of neoprene and other selected materials to create the finest rubber compound in the industry. Our Carbo-Tec rubber, "CTR", features excellent slip, heat, oil and chemical resistance and non-marking capability.

There's leather, and then there's SPR™ leather. The leather undergoes a special tanning process to make it 3 times stronger and 2 1/2 times more abrasion resistant than conventional leathers. This offers better protection against barnyard chemicals. SPR™ leather resists caustic alkali, sulfuric acid, calcium hydroxide, potassium phosphate, caustic potash and other barnyard acids. It's also pasture-proof.

SPR™ is a trademark of Georgia Boot®

This icon indicates an insulated style.

3M™ Thinsulate™ is an ultra-thin, versatile synthetic insulation that is lightweight, compression-resistant and provides warmth without bulk. 3M™ and Thinsulate are trademarks of 3M™

GORE-TEX® fabric features revolutionary patented technology that is windproof, waterproof and breathable. GORE-TEX® is a registered trademark of W.L. Gore & Associates, Inc.

Vibram® is a leader in high-performance soling products that are lightweight, long-wearing, flexible and resistant to abrasion, oil and slips. Vibram® and the yellow octagonal label are registered trademarks of Vibram S.P.A.

CORDURA® high-performance fabric provides resistance to tears, Abrasion-resistant and scuffs better than any other fabric of its kind. CORDURA® is a registered trademark of DuPont company.

Stay light on your feet with DuraBlend Foam cushioning. Our proprietary blend of EVA and rubber offers superior durability, cushioning, and compression set to prevent foot fatigue. This all-new cushioning system also offers greater elasticity than traditional EVA, improving underfoot response and comfort.

Boots with this icon are made with non-metallic materials and can pass through metal detectors. Non-Metallic boots are also made with nylon or plastic hardware which greatly reduces chances of scratching or marking surfaces.

TecTuff performance materials offer superior resistance against abrasions, oil, stains and water, lasting 10 times longer than traditional leather.

Anchor your foot in comfort and stability with the Anchor Disk™ by Georgia Boot®. The TPU stabilizer with built in shank is layered between materials to absorb shock and provide additional support and comfort in the areas that need it most.

Anchor Disk™ is a trademark of Georgia Boot®

The Georgia Boot Shovel Shank is an extra wide stability TPU platform built within the midsole of the boot for the ultimate support.

The Georgia Boot Shovel Shank XL is a double wide fiberglass shank that provides maximum support.

The Georgia Boot Climber Shank XL is a 5-ribbed steel shank that provides double the width and support of a traditional steel shank.

Georgia Boot's FLX-FIT technology is a 3D molded elastic detail which allows for effortless expansion of the boot shaft for easy on/off.

The Georgia Boot Wideload toe box is 15% larger than our standard toe boxes. The increased width allows those who have wider than average feet and desire all-day comfort, but still want the classic styling and features of Georgia Boot.

The Counter Lock system wraps around your heel and stabilizes you to give you a secure fit. It also acts as a kick off when removing your boot.

Lets face it, kids grow fast and are into a new size before you know it! Georgia Boot's 1-2 Grow On insole has a detachable layer that can be removed to give your little one an additional 1/2 size as they grow.

Outsole Ratings ●=Fair, ●●=Good, ●●●=Better, ●●●●=Best
Heat Resistance ●=Below 400°, ●●=400-500°, ●●●=500-572°, ●●●●=572°+ (Fahrenheit)

Styles shown with this icon have a wider size range than our standard sizing which is typically 7-12,13,14.

SAFETY FEATURES

ASTM - The American Society for Testing and Materials has been testing products and services, making them safer, better and more cost-effective. Standards developed at ASTM are the work of over 30,000 ASTM members. These technical experts represent producers, users, consumers, government and academia from over 100 countries. The proud tradition and forward vision that started in 1898 is still the hallmark of ASTM International.

STEEL Protective Toe and **Electrical Hazard**
Unless otherwise noted to be **NON Electrical Hazard**

ALLOY Protective Toe and **Electrical Hazard**
Unless otherwise noted to be **NON Electrical Hazard**

COMPOSITE Protective Toe and **Electrical Hazard**
Unless otherwise noted to be **NON Electrical Hazard**

Nano COMPOSITE Toe Called out in bullet points
Interwoven Carbon nanotubes in our Nano Composite toe boots allow us to create one of the strongest and lightest safety toes on the market. Our Nano Composite Toe technology also allows us to create a sleeker profile while offering more toe room and comfort.

The ERGO-FIT safety toe has been ergonomically designed to match the actual contours of human feet! This tapered design is more comfortable than traditional safety toes because it allows for better range of motion as you move and walk throughout the day.

Static Dissipative - F2413 Static Dissipative Classification

Protective Metatarsal - F2413 Protective Metatarsal Classification

Puncture Resistant - F2413 Puncture Resistant Standard

Soft Toe Electrical Hazard - F2892-18 Electrical Hazard Classification

EXTREME IMPACT PROTECTION - Soft internal met guard engineered to absorb maximum shock, hit after hit. XRD® is proven to absorb up to 90% of impacts while maintaining 98% of the original performance.
XRD® is a trademark of Rogers or its affiliate. © 2017 Rogers Corporation

The flexible, ASTM approved ANTImpact™ met guard material firms instantly when struck to offer the same level of protection as rigid met guards. After impact, the revolutionary material returns to its soft, flexible state, providing the wearer with the ultimate protection and comfort.

The Anti-Impact FLX met-guard provides unparalleled comfort without sacrificing performance. The internal met guard is non-metallic and has been designed to retain full comfort and flexibility with every step. Upon impact the met-guard provides a protective barrier to reduce and absorb impact, while also supporting the natural movement of the foot.

LTX GEORGIA LOGGER

UP TO 25% LIGHTER THAN OTHER LOGGERS

COMFORT CORE LOGGER

- Full-grain leather and high-abrasion textile upper
- Goodyear® welt construction
- Georgia Waterproof System
- Combo eyelet/hook hardware
- Comes with additional set of laces
- Removable brush guard kiltie
- Stretch Gusset Technology
- AMP LT insole with memory foam
- Climber Shank XL 5-ribbed steel shank
- Heat, chemical, abrasion, and slip-resisting dual-density PU and Carbo-Tec™ Rubber outsole
- ASTM F2892 Electrical Hazard Classification on soft toe styles
- Ergo-Fit safety toe designed to match contours of feet on protective toe styles
- Nano Composite safety toe on protective toe styles

INSOLES

30 DAY COMFORT GUARANTEE

In addition to our one year manufacturers defect warranty, all Georgia Boot Comfort Systems are backed by a 30 day Comfort Guarantee. Our Comfort Systems include the AMP, AMP LT, AMP X-Lite, CC5, CC6, CC7, Comfort Core Next Gen (CC8) and TDC insoles. If a customer purchases a pair of our footwear equipped with any of these Comfort Systems, or a pair of the insoles, and do not feel they are more comfortable than our competitors, they can return them within 30 days for a full refund. Returns will not be accepted without a proof of purchase from Georgiaboot.com or one of our Authorized Georgia Boot retailers.

GB00430 Comfort Core Next Gen

1. Memory foam adjusts for customized cushioning of the entire foot
2. Polyurethane layer for maximum cushioning
3. Individual shock-absorbing Comfort Core® pillars
4. Airflow channels provide cool circulation

M,L,XL,2XL

GB00110 AMP

1. Memory foam adjusts for customized cushioning of the entire foot
2. Heel cup provides support and comfort
3. Airflow channels provide cool circulation
4. Polyurethane layer for maximum cushioning

M,L,XL,2XL

GB00227 AMP LT

1. Dual layer combination of polyurethane bottom and a memory foam top to ensure that each insole is custom molded to your own foot
2. Heel cup provides support and comfort
3. Fits most Georgia Boot and competitors styles

S,M,L,XL,2XL

GB00111 CC5

1. Ergonomic Arch Support relieves foot fatigue and provides added comfort
2. Airflow channels provide cool circulation
3. Polyurethane layer for maximum cushioning

M,L,XL,2XL
