SAFETY FEATURES

COMPOSITE TOE
Composite toes contain non-metallic safety toe caps and are light. They are ideal for those working in electrical environments. They do not conduct heat or cold and are good for work in extreme high or low temperatures.

SOFT TOE
Some of our boots are made without a protective toe cap. These soft toe boots still may have other features such as, Electrical Hazard or Slip Resistance in the sole.

SLIP RESISTANT
Our outsoles marked slip resistant have been tested and meet or surpass industrial standards. Slip resistance has many variables. These tests are to be used as a guide to help make your decision. Test results are available upon request.

INSULATED
DieHard® uses 3M Thinsulate® insulation. Insulation can come in 200 grams and up. This is used in cold temperatures. Whether working outdoors or in a freezer, 3M Thinsulate helps keep your feet warm.

WATERPROOF
DieHard® uses membrane technology from HyDry® and others. Our boots are designed to resist water in wet situations as high as the membrane goes. Wear these with confidence that your feet will stay dry and comfortable.

MEMORY FOAM
Some of our boots include a memory foam insole that are constructed from soft polyurethane base with gel pressure point pads and a top layer of memory foam for all day comfort.

ELECTRICAL HAZARD
Electrical Hazard (EH) boots must be able to withstand 18000 volts of electricity at 60 hertz for a whole minute without leakage of more than one milliamperere under dry conditions. DieHard® EH boots have been tested and pass this standard.

Some of our boots include a memory foam insole that are constructed from soft polyurethane base with a top layer of memory foam for all day comfort.

This is our mantra. Powerful, durable, authentic, innovative... That's DieHard®

A brand that gives you the confidence to perform. If you're motivated by the powerful craving for new experiences, pushing boundaries and working until the job is done, then you are DieHard.

A footwear brand trusted to deliver quality, reliability, and unrivaled performance when and where it's needed. DieHard footwear is built to exceed expectations and provide confidence to handle any situation. Driven by a new look and attitude, the DieHard brand has been recharged with better materials, new looks and more comfort than ever.

BRAND LEGACY

Americans have trusted DieHard® to deliver exceptional performance and reliable products for over 50 years. Since its inception, DieHard has been at the forefront of innovation. The core of the brand's legacy is unrivaled performance in automotive batteries, which revolutionized the industry. Then in 1975, DieHard footwear was launched with the hard working customer in mind.

DieHard is growing to deliver products that reach new frontiers while still delivering the ultimate performance and dependable power customers have relied on since 1967.

HOSS
BOOT COMPANY

ABOUT US

About Us

HOSS Boot Company was founded with the belief that hard working men and women want more choices when it comes to selecting footwear for work. Our carefully crafted work boots and work shoes use the best materials possible to keep you safe while on the job.

HOSS has recently expanded its family of brands by acquiring the licensing for DieHard footwear. Moxie Trades women's work brand completes the group. We are excited for the future of these brands.

We continue to source globally with leathers from Argentina, Brazil and the USA as well as other countries. We have also diversified manufacturing to include India and Brazil. This allows us to never again have the sourcing crunch everyone experienced over the past two years.

The HOSS team has decades of experience at all levels from customer service to warehouse sourcing, sales and operations. We are here to help solve your business needs and mutually grow together.

Our goal is to build long term relationships with our retail partners resulting in brands that the customer comes back for over and over.

HOSS ICON GUIDE

ALL SAFETY FOOTWEAR PRODUCED BY HOSS BOOT COMPANY MEETS OR EXCEEDS ASTM F2413-18 STANDARDS

Composite toes contain non-metallic safety toe caps and are light. They are ideal for those working in electrical environments. They do not conduct heat or cold and are good for work in extreme high or low temperatures.

Steel safety toes are the industry standard and have been for years. Steel toes provide protection from falling objects and equipment.

Aluminum toes are made of lightweight materials and tend to be about 30 to 50 percent lighter than steel. Toe boxes provide the same level of safety as steel offer a bit more room than composite since aluminum is thinner than composite.

Lighter than traditional safety toe protection, the Carbon Nano toes guard your feet against impact and compression hazards

Some of our boots are made without a protective toe cap. These soft toe boots still may have other features such as, Electrical Hazard or Static Dissipation ratings and puncture plates in the sole.

HOSS uses membrane technology from HyDry® and others. Our boots are designed to resist water in wet situations as high as the membrane goes. Wear these with confidence that your feet will stay dry and comfortable.

Some of our boots include a memory foam insole that are constructed from soft polyurethane base and a top layer of memory foam for all day comfort.

Our outsoles marked slip resistant have been tested and meet or surpass industrial standards. Slip resistance has many variables. These tests are to be used as a guide to help make your decision. Test results are available upon request.

Electrical Hazard (EH) boots must be able to withstand 18000 volts of electricity at 60 hertz for a whole minute without leakage of more than one milliampere under dry conditions. HOSS EH boots have been tested and pass this standard.

Our Static Dissipation (SD) feature allows electric current to flow between you and the ground. HOSS SD boots meet all ASTM requirements.

Our flexible puncture resistant plate allows full sole coverage, as well as greater movement. This midsole plate is designed to reduce the hazards of puncture wounds caused by sharp objects penetrating the outsole.

MetGuard™ is a shield made with XRD® Impact Protection technology. It overlays the toe box and runs to the top of the instep, providing armor-like protection for the foot.

HOSS uses 3M Thinsulate® insulation. Insulation can come in 200 grams and up. This is used in cold temperatures. Whether working outdoors or in a freezer, 3M Thinsulate helps keep your feet warm.

Sizes larger than 15 or widths from 4E to 6E

HIKERS

RIDGE 60230 BROWN 60130 BLACK

- Composite safety toe
- Full-grain leather
- Non metallic eyelet hooks
- Waterproof membrane
- Premium P/U cushion insole
- Puncture-resistant midsole
- EVA midsole
- Slip-resistant rubber outsole
- Composite shank
- ASTM F2413-18 M/I/C EH PR
- Sizes 7-12, 13 D(M) and 2E(W)

TRAIL 53023 GREY

- Composite safety toe
- Action leather and mesh
- Waterproof membrane
- EVA midsole
- Rubber outsole with aggressive tread
- Fast rebound super cushion insole
- Composite shank
- ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14 D(M) and 2E(W)

TRACKER 50251 BROWN

- Composite safety toe
- 100% Non-metallic
- Full-grain crazy horse leather
- HyDry® waterproof membrane
- Rubber outsole with EVA mid sole
- Fast rebound super cushion insole
- TPU support system gives extra rigidity for extra support
- Composite shank

- Sizes 7-12, 13, 14, 15, 16, 17 4E(XW) and 6E(XXW)

STATIC DISSIPATIVE

CHASER

53010 GREY

- Composite safety toe
- Grooved leather and microfiber
- 100% Non-metallic
- Fast rebound super cushion insole
- EVA midsole with TPU support system
- Rubber outsole
- ASTM F2413-18 M/I/C SD 35
- Sizes 7-12, 13, 14 D(M) and (2E)W

BEEDLE

10165 BLACK

- Composite safety toe
- Mesh and microfiber
- 100% Non-metallic
- Fast rebound super cushion insole
- Lightweight slip- and oil-resistant outsole with EVA midsole
- ASTM F2413-18 M/I/C SD 35
- Sizes 7-13 D(M) and (2E)W

STEPPER ULTRA-LIGHT

30240 BROWN

- Composite safety toe
- Full-grain tumbled leather with nylon
- 15.9 oz per shoe
- Padded tongue and collar for comfort
- Premium P/U memory foam insole
- Internal XRD met guard for your protection
- Soft density EVA
- Slip-resistant rubber outsole
- ASTM F2413-18 M/I/C SD 35 MT
- Dual Gender Sizing 3-12, 13, 14 D(M) and 2E(W)

SLIPKNOT

30202 BROWN

30101 BLACK

- Composite safety toe
- Full grain tumbled leather
- 100% Non-metallic
- Fast rebound super cushion insole
- Lightweight slip- and oil-resistant outsole with EVA midsole
- ASTM F2413-18 M/I/C SD 35
- Sizes 7-12, 13, 14, 15 D(M) and 2E(W)
- Moxie Trades Women's model "Mary"
- MT23015 Black
- MT23026 Brown

SPARKS

10167 BLACK

- Composite safety toe
- Mesh and microfiber
- 100% Non-metallic
- Fast rebound super cushion insole
- Lightweight slip- and oil-resistant outsole with EVA midsole
- ASTM F2413-18 M/I/C SD 35
- Sizes 7-12, 13, 14 D(M) and (2E)W

TIKABOO ULTRA-LIGHT

60240 BROWN

- Composite safety toe
- Full-grain tumbled leather with nylon
- 17.5 oz per shoe
- Padded tongue and collar for comfort
- Premium P/U memory foam insole
- Internal XRD met guard for your protection
- Soft density EVA
- Slip-resistant rubber outsole
- ASTM F2413-18 M/I/C SD 35 MT
- Dual Gender Sizing 4-12, 13, 14 D(M) and 2E(W)

INSULATED COLD STORAGE FOOTWEAR

BLAST

60242 BROWN

- Composite safety toe
- Full-grain leather
- HyDry® waterproof membrane
- Premium P/U memory foam insole
- 400 gram Thinsulate®
- EVA midsole
- Slip-resistant rubber outsole with special ice gripping plugs for slip resistance on multiple surfaces
- ASTM F2413-18 M/I/C EH

CHILLER

60700 BLUE

- Composite safety toe
- Nubuck leather with soft mesh tongue
- HyDry® waterproof membrane
- Premium P/U memory foam insole
- 200 gram Thinsulate®
- EVA midsole
- Slip-resistant rubber outsole with special ice gripping plugs for slip resistance on multiple surfaces
- ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14 D(M) and 2E(W)

HUDSON

60466 BROWN

- Composite safety toe
- Soft full-grain oily brown leather
- HyDry® waterproof membrane
- Premium P/U memory foam insole
- 400 gram Thinsulate®
- Slip-resistant rubber outsole with P/U midsole
- Puncture-resistant midsole
- ASTM F2413-18 M/I/C EH, PR
- Sizes 8-12, 13, 14 D(M) and 2E(W)

BLIZZARD

60150 BROWN

- Soft toe
- Soft full-grain oily brown leather
- HyDry® waterproof membrane
- Premium P/U memory foam insole
- 400 gram Thinsulate®
- Slip-resistant rubber outsole with special ice gripping plugs for slip resistance on multiple surfaces
- ASTM-F2892-18 EH
- Sizes 8-12, 13, 14, D(M) and 2E(W)

CHILLER

60100 BLACK

- Composite safety toe
- Nubuck leather with soft mesh tongue
- HyDry® waterproof membrane
- Premium P/U memory foam insole
- 600 gram Thinsulate®
- Slip-resistant rubber outsole with special ice gripping plugs for slip resistance on multiple surfaces
- ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14 D(M) and 2E(W)

BRONC 8"

80244 BROWN

- Composite safety toe
- Full-grain tumbled leather padded suede tongue and guset
- HyDry® waterproof membrane
- Fast rebound super cushion insole
- Lenzi® puncture-resistant midsole
- 800 gram ultra Thinsulate®
- HOSS mud releasing outsole
- ASTM F2413-18 M/I/C EH, PR
- Sizes 8-12, 13, 14 2E(W)

BRONC 8" (SOFT TOE)

80446 BROWN

- ASTM F2892-18 EH
- Sizes 8-12, 13, 14 2E(W)

ATHLETIC WORK

SHOVELHEAD

10160 BLACK

- Composite Safety Toe
- Tough abrasion resistant perspair material
- Fast rebound cushion insole
- Molded heel counter
- Injected EVA dual density midsole
- Slip-resistant rubber outsole
- Composite shank
- Meets ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14 D(M) & 2E(W)

RENO II

10229 BLACK

- Composite safety toe
- 100% Non-metallic
- Action leather and nylon mesh upper
- Waterproof membrane
- Fast rebound super cushion insole
- Cement construction
- Highly slip-resistant carbon rubber outsole
- Composite shank
- Mens ASTM F2413-18 M/I/C EH
- Women's ASTM F2413-18 F/I/C EH
- Men's Sizes 7-13, 14, 15 D(M) & 2E(W)
- (12.5 Available)
- Women's Sizes 4-10, 11 B(M) & D(W)

FULL COURT

50148 NAVY

50147 BLACK

- Composite safety toe
- Extremely light safety basketball style shoe
- Mesh and microfiber / mesh and patent leather
- Weighing 2 lbs. per pair
- Form fitting neoprene internal construction
- Easy on lace/zipper combination
- Fast rebound super cushion insole
- Composite shank
- Slip-resistant rubber outsole
- ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14, 15 D(M) & 2E(W)

METEORITE

30155 BLACK

- Composite safety toe
- Microfiber and mesh
- Extremely light at 12.1 oz. per pair
- Fast rebound super cushion insole
- Composite shank
- Soft density EVA
- Slip-resistant rubber outsole
- ASTM F2413-18 M/I/C EH
- Sizes 8-12, 13, 14 D(M) & 2E(W)

EXPRESS

13032 GREY

14431 BLACK BLUE

- Composite safety toe
- Microfiber leather and nylon mesh with printed overlay
- 100% Non-metallic cement construction
- Extremely light at 14.8oz. per pair
- Fast rebound super cushion insole
- Unique blend of compounds gives bounce in step and absorbs shock
- Composite shank
- Highly slip-resistant carbon rubber outsole
- ASTM F2413-18 M/I/C EH
- Extra matching laces in box
- Sizes 7-13, 14 D(M) & 2E(W)
- (12.5 Available)

RIM FLY

50152 BLACK RED

- Composite safety toe
- TPU overlay and poly fly knit
- Extremely light safety basketball style shoe
- Weighing 2 lbs. per pair
- 100% Non-metallic cement construction
- Fast rebound super cushion insole
- Unique blend of compounds gives bounce in step and absorbs shock
- Composite shank
- Slip-resistant rubber outsole
- ASTM F2413-18 M/I/C EH
- Sizes 7-13, 14, 15 D(M) & 2E(W)
- (12.5 Available)

WOMEN'S

HOSS BRANDING IRON

HOSS offers branding irons in support of customer sales promotions. Please request them from your sales associate. There is limited supply. Minimum purchase required.

**2023
BUYER'S GUIDE**

ABOUT US

Founded in 2006, Moxie Trades began with the goal of providing home renovation services primarily by teams of women. Fate intervened as the brand grew and it's direction changed to suit the needs of the market. Through sheer grit and determination, Moxie Trades has evolved into the most recognized brand of safety footwear for women in Canada.

In 2018, Moxie Trades partnered with HOSS Boot Company to expand Moxie Trades' product offering and distribute our specialized women's work boots and shoes to retailers across the United States.

The Moxie Trades story is about making the best products with the best brand with the best customer service. Not only do we sell work boots but we share moxie with women everywhere. Moxie Trades is not about the work boots, it's about the women who wear them.

Moxie is the ability to face fear with spirit and courage.

Find Your MOXIE...We Dare YOU!

MOXIE TRADES SYMBOL GUIDE

Composite toes contain non-metallic safety toe caps and are light. They are ideal for those working in electrical environments. They do not conduct heat and cold and are good for work in extreme high or low temperatures.

Aluminum toes are made of lightweight materials and tend to be about 30 to 50 percent lighter than steel. Toe boxes provide the same level of safety as steel but offer a bit more room since aluminum is thinner than composite.

Steel safety toes are the industry standard and have been for years. Steel toes provide protection from falling objects and equipment.

Moxie uses membrane technology from Tri-tex® and others. Our boots are designed to resist water in wet situations as high as the membrane goes. Wear these with confidence that your feet will stay dry and comfortable.

Our outsoles marked slip resistant have been tested and meet or surpass industrial standards. Slip resistance has many variables. These tests are to be used as a guide to help make your decision. Test results available upon request.

Electrical Hazard (EH) boots must be able to withstand 18000 volts of electricity at 60 hertz for a whole minute without leakage of more than one milliamper under dry conditions. Moxie EH boots have been tested and pass this standard.

Our Static Dissipation (SD) feature allows electric current to flow between you and the ground and also provides a measure of electrical insulation. Moxie SD boots meet all ASTM requirements.

Our flexible Lenzi® puncture resistant plate allows full sole coverage, as well as greater movement. This midsole plate is designed to reduce the hazards of puncture wounds caused by sharp objects penetrating the outsole.

MetGuard™ is a thermal plastic urethane shield made with XRD® Impact Protection technology. It overlays the toe box and runs to the top of the instep, for armor-like protection of the bones of the foot.

This CSA symbol indicates that the product has sole puncture protection with a Grade 1 protective toe for a heavy work environment such as construction, machine shops, or where sharp objects are present.

This symbol indicates electric-shock protective footwear.

This symbol indicates meta-tarsal protection.

ALICE

MT50162 (PINK)

MT50161 (TAN)

- Steel safety toe
- Full-grain, soft nubuck leather
- Tri-tex® waterproof breathable lining
- Cushion foam insole
- Puncture-resisting plate
- Direct attach PU/PU slip-resistant outsole
- Extra black lace in box for pink and tan
- ASTM F2413-18 F/I/C EH PR
- CSA Approved Grade 1
- Sizes 5, 6-10, 11 D(W)
