

UTILITY

SS23
USA

OTHERS BUILD WORK BOOTS TO MAKE WORK BETTER. AT KEEN UTILITY, WE BELIEVE IN CREATING WORK BOOTS THAT MAKE YOUR WORK AND YOUR LIFE BETTER.

That means delivering the kind of safety, comfort, and performance that contributes to living a richer, fuller, multidimensional life—on the job and off. A life lived with passion and without boundaries—from worksites to the mountains and everywhere in between.

TECHNOLOGY

STEEL TOE

Asymmetrical steel safety toes provide maximum comfort and unobtrusive fit like you've never felt before.

ALUMINUM TOE

Asymmetrical aluminum safety toes weigh 35% less than steel and offers a sleeker appearance than a composite toe.

COMPOSITE TOE

Asymmetrical composite safety toes provide 100% non-metallic and are 10% lighter weight than steel.

CARBON-FIBER TOE

Asymmetrical carbon-fiber safety toes provide a 100% non-metallic, lightweight, and unobtrusive fit and are 15% lighter than steel.

SOFT TOE

Soft toes feature KEEN.Protect toe caps to help safeguard against minor impact, but are not reinforced with a secondary crush resistance.

KEEN.DRY

A proprietary waterproof, breathable membrane that lets vapor out without letting water in.

OIL-AND SLIP-RESISTANT

Oil and slip resistant outsoles that meet or exceed ASTM F2413 SATRA & MARK II F1677-96 non-slip testing standards.

EH-RATED

Provides a secondary source of protection when outsole accidentally comes in contact with live electrical circuits, helping to reduce the potential of electric shock.

ESD-RATED

Helps reduce excess static electricity by conducting the charge from the body to the ground.

PUNCTURE RESISTANT

Puncture resistant boots help reduce the possibility of injury caused by sharp objects that can penetrate the bottom of a boot.KEEN Utility uses a non-metallic, woven midsole plate that meets ASTM and CSA standards.

MET GUARD

Metatarsal guards help provide extra protection over the vulnerable top of the foot. KEEN Utility external guards are made of a composite nylon or plastic; while our internal guards are made of lightweight, flexible foam that hardens on impact, helping to reduce injury.

BARNYARD RESISTANT LEATHER

Superior leather resists the damaging effects of oleic acid, urea, sodium chloride, and ammonium hydroxide in order to extend the life of your boot.

POLAR TRACTION

KEEN.POLAR TRACTION micro-glass filaments combined with an oil and low temp flex resistant rubber outsole offers optimal traction on wet or oily surfaces by piercing the surface.

KEEN.WARM

Lightweight insulation provides warmth across a range of temperatures. KEEN Utility Offers Work boots with insulation from 200g to 800g.

NON-METALLIC

Non-metallic work boots serve as an alternative to steel and aluminum toed shoes, helping expedite trips through metal detectors.

NON-MUTILATING

Nylon, plastic, or concealed eyelets help reduce the chance of marking surfaces during accidental contact. Ideal for manufacturing plants where scratches to product are a major concern.

TECHNOLOGY

HEAT RESISTANT OUTSOLE

Solid rubber outsoles help ensure safety in hazardous, hot environments, such as steel mills or foundries where hot surfaces from welding, grinding, and cutting are common.

90° HEEL

A 90-degree heel helps provide stability and reassurance to the wearer as it helps secure the foot in place on ladders, poles, and other structures. The majority of KEEN Utility 90-degree heels are 5/8"

SIPED OUTSOLE

Siped outsole provides special channels for dispersing liquids quickly and increased traction on wet or icy surfaces.

ABRASION RESISTANT

Exceptional abrasion resistant and high tensile and tear strength fabric protects throughout a hard day's work.

REFLECTIVE

Reflective webbing for additional safety and visibility in dim and hazardous conditions.

CLEANSORT NXT

Cleansort NXT probiotic-based technology microbes produce enzymes that break down the odor in sweat.

KEEN.BELLOWS FLEX

KEEN.BELLOWS FLEX technology is designed to allow the foot to bend and flex with ease - working with the foot, never against it. This lightweight PU mold makes bending 3x easier.

KEEN.KEY TECH

Full-length TPU stability plate fits into the midsole of the shoe like a key, helping to provide heel stability, medial and lateral support, forefoot stone bruising protection.

KEEN.KEY TECH FLEX

KEEN.KEY-TECH FLEX offers contoured TPU Torsion Stability from heel to forefoot while helping to reduce foot fatigue on uneven surfaces, and offers increased flexibility for easy knee down work.

KEEN.REGEN

Delivers a 50% energy return when compared to EVA. This bounce helps you feel light on your feet.

LUFTCORE

LuftCore technology embeds a lightweight, air-injected core into higher-density foam for enhanced midsole cushioning and shock absorption.

LUFTCELL

Featuring nearly 100,000 air bubbles per cubic centimeter, infused into the midsole, KEEN Luftcell technology provides lightweight comfort, allowing all-day wear with less weight.

KEEN.TOUGHSOLE

Oil-and slip-resistant outsole that is lighter weight and more durable than rubber.

KEEN KONNECTFIT

KEEN KonnectFit heel-capture system for a locked-in feel.

KEEN.WET TRAX

KEEN.WET TRAX outsole quickly channels liquids to maximize surface area contact.

TRADESWOMEN TESTED

The Tradeswomen Tested stamp of approval is given by KEEN Utility's Tradeswomen Ambassadors; a group of hardworking women across a wide range of trades who have guided us to better understand their wants and needs for safety footwear.

NEW MEN'S FOOTWEAR

FORT WAYNE

The Fort Wayne is a new match for your old-fashioned work ethic, taking a time-tested moc toe design and reinventing it for the demands of today's tradespeople. A Luftcell wedge midsole, carbon-fiber safety toe with additional wrap-over protective rubber cap, and KEEN.DRY waterproof, breathable membrane combine to make this boot a new jobsite classic.
