

FALL 2023

 **LACROSSE**®

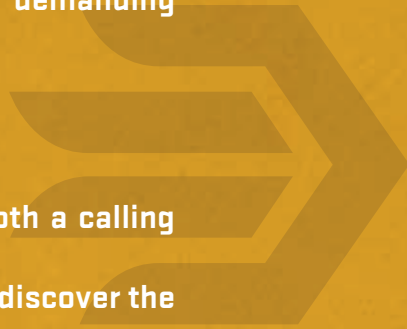

Being deep in the woods sparks a knowing. There's a know-how that's been handed from generations past, stitched into a heavy wool coat. There's also one that lives in the "now," demanding smart gear for the mission at hand.

We understand our deep need to be outdoors as both a calling and an answer – a calling to get out and explore. To discover the sensation of pulling your boots out of the mud at the bottom of a bog. To feel the thrill of cresting the ridge and seeing nothing but rolling hills.

What we find along the way is the answer. A silent response to "What does this all mean? What is it all for?"

When we pull on our boots in the frosty morning air, we pick our path. And our path is one that's **FOREVER FORWARD**®.

 **LACROSSE**®

FOREVER FORWARD®

OUR COMMITMENT

DEDICATED TO THE LAND.

DEVOTED TO THE HUNT.

PRESERVING THE HUNT.

Hunting is a way of life. And we proudly support it. Together with the National Wild Turkey Federation we are conserving wild turkeys and protecting our deep hunting heritage.

THE FUTURE STARTS TODAY.

For generations, we have been a part of the agriculture community. Today that continues as we partner with the FFA to support young men and women who are preparing for careers and leadership in agriculture.

MEET THE MARSH.

The first time hunting waterfowl is an incredible experience. To encourage more people to join in the sport, we are proud to support First Hunt, North America's largest waterfowl hunter recruitment program.

BOOTS ON THE GROUND.

Managing a sustainable deer population is a year-round responsibility. So we've partnered with the National Deer Association to inspire action through research, education, and new hunter recruitment to ensure a bright future for deer hunting.

OUR DIFFERENCE

AEROFORM[®]

TECHNOLOGY

They say form follows function. We say function follows AeroForm. Our revolutionary AeroForm technology injects liquid polyurethane into a mold around every boot's core to create a lightweight and waterproof shell that's unequaled in comfort and durability. AeroForm. It's something you have to feel to believe.

1. POLYURETHANE SHELL

Delivers a glove-like fit around your foot while being lightweight, flexible and insulating.

2. OUTSOLE

Premium-grade rubber outsole joins the polyurethane shell, creating an inseparable bond.

3. FOOTBED

Adds an extra layer of cushioning while being removable for a custom fit.

4. MIDSOLE

Delivers incredible cushioning, shock absorption and insulation underfoot.

5. SHANK

Covers your entire arch area for added support and protection when climbing trees or traversing rough terrain.

* U.S. Utility Patent No. 8984776

ALPHA CONSTRUCTION

Boss. Ruler. Chief. Alpha is a term for the leader of the pack, and our Alpha construction proves that. It's built with hand-laid natural rubber over neoprene for durability, flexibility and waterproof protection you can trust.

1. PREMIUM RUBBER

Best-in-class rubber is hand-laid around the core for a precise fit with multiple layers placed in key areas for support and durability. When finished, its scent-free and waterproof protection can't be beat.

2. NEOPRENE CORE

Offers waterproof comfort in the wettest of conditions. It is also extremely flexible to ensure your boot comes on and off with ease.

3. INSULATION

A layer of lightweight Thinsulate™ Ultra Insulation wraps your foot for warmth and added comfort.

4. SHANK

Offers protection underfoot when climbing ladders and stability while walking on uneven surfaces.

5. FOOTBED

Adds an extra layer of cushioning and is removable for a custom fit.

6. OUTSOLE

Molded with premium-grade rubber to ensure it won't turn rock-hard in the cold or sticky-soft in the heat.

AIR-CIRC

SYSTEM

Climate Control For Your Feet.

Our multilayered Air-Circ system promotes airflow inside of the boot, keeping feet cooler and drier. To do this, we combine a perforated foam liner with a thick mesh layer that together draws moisture away from the foot and allows air to circulate within the boot.

1. NEOPRENE CORE

Delivers flexible waterproof comfort.

2. MESH LAYER

Provides airflow within the boot and adds cushioning comfort.

3. PERFORATED LINER

Draws moisture into the mesh layer for faster drying and allows air to circulate against the feet.

LACROSSE BOOT

SIGNATURE FEATURES

ANKLE FIT

Say goodbye to sloppy-fitting rubber boots. Our ankle fit is precise and comfortable to keep your feet from pulling loose in deep mud.

ACTIVE FIT

Easy on. Easy off. Our Active Fit features a more athletic and glove-like feel. The neoprene core adds foot-hugging cushion all around your foot as well as flexibility in all of the right places.

ZXT RUBBER

Abrasion resistant. Ozone resistant. Incredibly hard to tear. ZXT rubber takes our already premium rubber compound to the next level. It's stronger, more durable and ready to protect your feet from the harshest conditions.

FUNCTIONAL GUSSET

Big calves. Little calves. No problem. Our signature gusset accommodates various calf sizes and also make it easy to tuck pants in. Plus, it allows you to roll down the boot when it gets warm.
