SD10 DUAL RESISTOR

Dual Resistor SD precisely and reliably provides 1 to 10 megohms of electrical resistance (SD 10), meeting the latest ASTM F2413-18 standard, updated 2018. With Dual Resistor SD not only do you get assurance that your footwear will consistently pass the SD 10 level, but with two resistors you can be confident that it will pass time and time again.*

- Meets SD 10, the latest ASTM F2413-18 standard, updated 2018
- Precisely provides 1 to 10 megohms of electrical resistance
- Features a fail-safe system for consistent and reliable SD 10 performance
- Patented technology (US Patent 6,421,222)

* The static dissipative performance of SD footwear may vary depending on environmental conditions of the complete system of footwear, which includes clothing, foot moisture, and items put in the footwear (e.g. foot powder, insoles, etc.). These conditions may adversely affect SD performance.

CUSHGUARD

MET GUARD PROTECTION. SURPRISING COMFORT.

Cushguard™ flexes and bends with ease, so you won't notice it while walking, but Cushguard's™ EVA foam provides met-guard impact protection against falling objects.

- Multi-Directional Flex
- Ultra-Light, Ultra-Comfortable
- Met-Guard protection
- Thin profile for increased comfort

FEATURES & BENEFITS ICONS

- ASTM F2413** **ASTM F2413-** The official standard for safety toe protective footwear in the United States.
- ASTM F2892** **ASTM F2892-** The official standard for soft toe protective footwear in the United States. (Non-Safety/Non-Protective Toe)
- COMP TOE** **Composite Toe-** A non-metallic rigid polymer protective toe cap, which is lightweight and will not conduct heat, cold or electricity. Meets or exceeds ASTM F2413 standard for protective footwear.
- STEEL TOE** **Steel Toe-** Non-corrosive protective toe cap. Meets or exceeds the ASTM F2413 standard for protective footwear.
- ALLOY TOE** **Alloy Toe-** A protective toe cap with a specialized blend of metals to minimize weight and maximize protection. Meets or exceeds the ASTM F2413 standard for protective footwear.
- CARBON TOE** **Carbon Toe-** Carbon protective toe minimizes weight and maximizes impact protection (meets ASTM F2413)
- SOFT TOE** **Soft Toe-** No toe cap protection.
- XTR COMPOSITE** **XTR® Brand Composite Toe Cap-** The XTR® Brand composite toe cap provides extra toe room and comfort. The XTR® composite toe cap is lightweight and will not conduct heat, cold or electricity. The XTR® Brand composite toe cap meets or exceeds the ASTM F2413 standard for protective footwear.
- XTR STEEL** **XTR® Brand Steel Toe Cap-** The XTR® Brand steel toe cap is designed with maximum toe room for increased comfort. The XTR® steel toe cap meets or exceeds the ASTM F2413 standard for protective footwear.
- XTR ALLOY** **XTR® Brand Alloy Toe Cap-** The XTR® Brand alloy toe cap contains a specialized blend of metals to minimize weight and maximize protection. The XTR® alloy toe cap is lighter than steel, while still meeting or exceeding the ASTM F2413 standard for protective footwear.
- XTR CARBON** **XTR® Brand Carbon Toe Cap-** The XTR® Brand carbon toe cap contains a specialized blend of carbon and composite materials to reduce weight and maximize toe room for increased comfort. The XTR® carbon toe cap meets or exceeds the ASTM F2413 standard for protective footwear.
- SD10 DUAL RESISTOR** **Static Dissipating with Dual Resistor-** Dual Resistor SD is a Warson Brands patented technology (US Patent 6,421,222) that precisely and reliably provides 1 to 10 megohms of electrical resistance, ensuring that the footwear meets the SD 10 standard.
- EH** **Electrical Hazard-** EH footwear provides a source of protection to the wearer from electrical shock in environments where the wearer may accidentally step on a live wire or charged electrical equipment.
- CD** **Conductive-** Conductive (CD) footwear offers no electrical resistance and allows all electricity to pass from the wearer to the walking surface, thereby preventing static buildup and discharge. Conductive footwear provides no protection against electrical current.
- MET GUARD** **Metatarsal Guard-** A reinforced layer in the metatarsal portion of the footwear that protects the metatarsal bones by deflecting falling objects and absorbing impact energy. Meets or exceeds the ASTM F2413 standard for metatarsal protective footwear.
- PR** **Puncture Resistant-** An insole material which is permanently affixed inside the shoe to prevent the penetration of certain objects through the bottom of the sole of the shoe. Meets or exceeds the ASTM F2413 standard for puncture resistance.
- SR ASTM F3445** **Slip Resistant-** Soles designed to provide a high coefficient of friction with the walking surface to improve slip resistance.
- AIRPORT FRIENDLY** **Airport Friendly-** Footwear that contains minimal metal hardware and will not activate most airport metal scanning devices.
- METAL FREE** **Metal Free-** Footwear that contains zero metal. 100% metal free. It is ideal for jobs that require working around sensitive metal detectors.
- WP** **Waterproof-** A combination of water-resistant materials and construction which helps protect the foot from getting wet in environments where excess water is present.
- FF FOOTFUEL** **The FootFuel® Footbed-** Footbed technology engineered to deliver higher levels of control, comfort and energy return. With just the right amount of cushioning, FootFuel® provides both comfort and stability for a unique fit and explosive performance.
- F2A** **The Foot Force® Footbed-** A soft molded dual density polyurethane removable insole that cushions and cradles your foot, provides additional shock absorbing polyurethane ball and heel pads and a moisture absorbing fabric covering.
- TAA** **TAA Compliant-** Manufactured in a country listed in the Trade Agreements Act. GSA schedule compliant.
- ZIP** **Quick-Access Side Zipper-** Quick-access side zipper for the convenience of a slip-on shoe in a 6" to 8" boot.
- AIR** **Aircom™ Athletic Air Comfort Technology-** Located inside the heel offering unmatched cushioning and walking comfort.

Canadian Features and Benefits

- CSA Impact-** Reebok footwear is manufactured to meet or exceed CSA Grade 1 Protective Toe. A Blue rectangle indicates Grade 1 protective toe without puncture protection. Grade 1 protective toe withstands impacts of 125 Joules and maintains standard minimum clearances depending on the shoe size. Comparable to a 22.7 kg (50 lb) weight dropped from a distance of 0.6 m (23.6 in).
- Electrical Shock Resistance-** Reebok footwear is manufactured to meet or exceed CSA Grade 1 Protective Toe for Electrical Shock Resistance. Its purpose is to certify that the footwear contains a sole and heel design assembly that, at the point of manufacturing, has electrical insulating properties intending to withstand 18,000 volts with a leakage current not exceeding 1mA. This is for any industry where accidental contact with live electrical conductors can occur.
- WARNING: Electrical Shock Resistance deteriorates with wear and in wet environments.*
- Puncture Protection-** Reebok footwear is manufactured to meet or exceed the CSA Grade 1 Protective Toe. A Green triangle indicates sole puncture protection with a Grade 1 protective toe to withstand impacts of 125 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from a distance of 0.6 m (23.6 in). Sole puncture protection is designed to withstand a force of not less than 1200 Newtons (270 lb ft) and resists cracking after being subjected to 1.5 million flexes. For any industry, especially construction and heavy work environments, where sharp objects, such as nails are present.
- SD-CD** **Static Dissipative + -** This footwear is designed to dissipate static electricity from the wearer's body into the walking surface in order to prevent static electricity buildup. Our exclusive patented (US Patent 6,421,222) dual resistor technology maintains precise and consistent resistivity from 1-35 megohms (3.5 x 10⁷ ohms). These shoes are for use in areas where the generation of static electricity could harm electrical equipment, circuit board assembly, the manufacture of computer chips or paint application processes. This dual resistor footwear meets or exceeds the CSA Z195 standard for protective footwear.

RATINGS KEY

- SLIP RATING** Indicates passage of ASTM F3445 standard, which tests the outsole on dry/wet quarry tile.
- METAL CHIPS** Indicates the shoe's protection of the bottom of the foot from penetration by metal chips.
- OIL RATING** Oil Rating: indicates slip resistance of outsole in the presence of oily conditions, specifically kitchen environments.
- HEAT** Indicates heat resistance of the outsole to a hot contact, showcasing resistance against outsole melting and deformation.
- ABRASION** Indicates outsole durability and ability to continue to protect over time and against tough terrain.
- CHEMICALS** Indicates outsole durability and indicates whole shoe durability and cleanliness against a variety of common industrial chemicals.
